Exhibit 'B'

The mechanic's lien which is the subject of this notice is intended to apply and attach to the interests in the property of the subject owner to the extent of all labor, services, equipment and/or materials, including without limitation pipes, structures, mechanisms and other parts associated therewith, provided by claimant (collectively hereinafter referred to as the "Items") to or for the benefit of the owner enabling the transportation and control of natural gas through the owner's distribution system, and any easements, leases, licenses, rights and other property interests of owner that are appurtenant or related thereto.

Notwithstanding any provision herein which may appear to be to the contrary and except to the extent permitted by law, claimant does not assert a present mechanic's lien on or to the extent of any real property or related interest owned or held by (1) a governmental unit or other entity which may not be subjected to a mechanic's lien under California law or (2) any person or entity other than Pacific Gas and Electric Company and its affiliates as their interests may appear.

The nature and extent of the herein-contained location descriptions and other identifying information for the Items have been placed in the public record with a view toward providing notice to the owner and other parties of claimant's mechanics lien while also safeguarding paramount interests of public safety and security. More specific and related location information is already in the possession of the owner, and claimant would consider making such information available to any other party with proper purpose subject to necessary public safety considerations and confidentiality restrictions.
